USER TEST PLAN

Your Team Name:

	Section		Your User Test	Instructions
1	List your key User Outcome(s) Your Design Feature(s) that are flagged			These should be described in 1-3 words each.
2	Set the Stage (Context & Framing)			Write a welcome and intro message for users. Make sure your message includes the following at a minimum: +Set fidelity, recording, and time expectations +Minimize bias such as social desirability +Instruct the user to use the talk aloud method
3	Task Scenario			Write a hypothetical scenario for the user that puts them in a realistic use case. End it with a task they will be completing. Bad examples: "You discovered an app. Create a user account " | "You found our app on the marketplace. Go to the home page and click on 'see more.'" Good example: "You are struggling to learn the concepts in your IS 201 class. Find a study partner." ***Choose a task that will allow you to directly test the unique capability(s) of your app or website, and the user outcome(s) your discovery research suggested was most important.
4	Pre-Task Survey Questions		Examples are below	List each question you will ask prior to the tasks your user will perform.
		Q1	scale 1-7: i am confident in my ability to trade stocks	Pair scale with open-ended questions.
